DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James M. Alpert (Reg. No. 59,926) on 9/7/2007.

In the claims:

Claim 2, line 1 'The integrated circuit as set forth in claim 1' has been changed to ---

The integrated circuit as set forth in claim 8---

Claim 3, line 1 'The integrated circuit as set forth in claim 1' has been changed to ---

The integrated circuit as set forth in claim 8---

Allowable Subject Matter

2. Claims 2-3 and 8-9 are allowed.

3. The following is an examiner's statement of reasons for allowance: The art of record does not suggest the respective claim combinations together and nor would the respective claim combinations be obvious with:

4. Re claim 8, the further limitation of, *"an integrated circuit of a front-end type for receiving a high frequency signal, comprising: an RF circuit including a variable gain amplifier; a digital demodulating circuit including an amplification rate control circuit;*

switching means for switching between (a) inputting an internal signal, as an amplification rate control signal, into the variable gain amplifier via an automatic gain control loop, the internal signal being outputted from the digital demodulating circuit and (b) directly inputting fixed value signals, as additional amplification rate control signals, into the variable gain amplifier by opening the automatic gain control loop; and a switching circuit for switching between, in accordance with an output draw-out switching control signal, (a) inputting a base band analog output to the digital demodulating circuit, and (b) outputting the base band analog output to outside via an inspection-use output terminal, the base band analog output being outputted from the RF circuit, wherein the RF circuit and the digital demodulating circuit are integrated in one package, and the switching means are switched over in accordance with a switching control signal".

Claims 2-3 and 9 depend on claim 8 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
